

AMENDMENTS

Please amend the above-identified application as follows:

In the Specification

Please replace the specification of the application of record with the substitute specification enclosed herewith as Attachment 1.

In the Drawings

Enclosed as Attachment 3 are three (3) sheets of red-lined drawings. Submitted with this paper are formal drawings to replace the informal drawings originally filed in the application. The formal drawings include the noted red-lined changes.

In the Claims

Please cancel claims 1-20 without prejudice or disclaimer.

Please add the following new claims 21-40:

- 05917421.072001
- A1
-
21. A hooks module for use in a computer graphics system including graphics hardware controlled by a graphics library that includes graphics library functions responsive to function calls generated by a graphics diagnostic tool executing on the computer graphics system,
- wherein the hooks module is configured to attach the graphics diagnostic tool to predetermined portions of the computer graphics system during normal operations of the graphics application and without interruption to the normal operations of the graphics application.
22. The hooks module of claim 21, wherein the hooks module includes one or more event generators, operatively located in the graphics library, configured to perform a diagnostic operation during normal operations of the graphics application.
23. The hooks module of claim 21, wherein the graphics library further includes an applications program interface (API) for invoking the graphics library functions in
